**EBARA INTERNATIONAL CORPORATION STANDARD PUMP DIVISION
ANNOUNCES NEW ECONOMICAL PUMP: MODEL DMLU**

ROCK HILL, SC – MARCH 31, 2005 – EBARA International Corporation (EIC) Standard Pump Division announces the addition of a new, economical non-clog, single channel impeller pump: the model DMLU. The model DMLU is suitable for use in commercial and industrial wastewater applications including sewage, water, wastewater, drainage, effluent, and dewatering

The model DMLU handles capacities from 55 GPM to 1345 GPM and heads to 136 feet with a horsepower range from 3HP up to 30 HP. The DMLU is available in (discharge) sizes from 3 to 6 inches.

The Model DMLU is constructed of robust cast iron with a large diameter, short overhang shaft and stainless steel fasteners. The enclosed single channel impeller has 3" spherical passage that also prevents clogging. An oil lubricated double mechanical seal with lower faces of hard silicon carbide provides strong and reliable shaft sealing
