IMPACT STATEMENT REGARDING COVID-19

As most are aware, the World Health Organization has declared the COVID-19 (novel coronavirus) outbreak a pandemic. Over the past couple of months, the virus has spread globally causing US and foreign governments to rapidly expand efforts to contain the virus and limit the impact on human health.

Given the global nature of business, the speed of countermeasure implementation by governments and multitudes of media outlets reporting news from all over the world, EBARA Pumps Americas Corporation is committed to keeping our channel partners updated with the most accurate information possible as specifically related to EBARA manufacturing and supply chain operations.

We would like to assure you that as of today, Thursday, March 12, 2020, our overseas and domestic factories are not experiencing any delays in production related to the COVID-19 outbreak.

Additionally, banking, financial and insurance services in overseas locations which are essential for all commerce are reported as operating normally.

Some delays and congestion have been reported at ports and land terminals as precautionary measures are implemented, but nevertheless they remain operational.

As part of the global community, EBARA Corporation is dedicated to health and safety of all people and is following guidelines from local, national and global health organizations in best efforts to protect the health of our employees and their families during these uncertain times.

We will provide additional updates as required over the coming weeks.

Best regards,
