

# EBARA Pumps Europe launches the Model EVMS-K Pump

March 29, 2021

EBARA Pumps Europe S.p.A. (EPE), Gambellara, Italy launched the new Model EVMS-K Pump mainly for the European market.

## 1. Background and Objectives

In accordance with the medium-term management plan “E-Plan 2022”, the EBARA Group strengthens the development of energy efficient, miniaturized, lighter, and smarter products and systems in our Standard Pumps strategy. From a market-in perspective, we will bring products that meet local needs to market by expanding sales bases and enhancing development systems in the global market.

## 2. Overview of the Model EVMS-K Pump

The Model EVMS-K Pump is a new product integrating the Model EVMS Pump with the Model E-SPD Inverter, both are existing products of EPE. Integrated with an inverter, it is possible to save energy of a motor, drive a pump highly efficiently, reduce installation space, and simplify wiring and installation works.

## 3. Future Plan

With our technological capabilities since 1912, the EBARA Group will focus on the product development to further pursue efficiency and innovativeness and enhance the brand value in the global market. In the meanwhile, maximizing our global network, we will contribute to a creation of the sustainable society by responding to local needs of each country through our products and services.

The EBARA Group aims to contribute to the achievement of the Sustainable Development Goals (SDGs) by tackling the material issues identified in its long-term vision and implementing the medium-term management plan to increase corporate value.
